

# ANIMAL ESTATES 5.0 PORTLAND

Douglas F. Cooley Memorial Art Gallery, Reed College

**BUILD A BETTER SNAG!**  
 The Portland Animal Estate is a residential tower which simulates a snag, or dead tree, accommodating seven native Portland species.

# 5.01 VAUX'S SWIFT

*Chaetura vauxi*

The top eight feet  
of the Portland  
Animal Estate tower  
is a hollow chimney  
cavity for the Swifts  
to nest in.

PORTLAND ANIMAL CLIENT 5.01 VAUX'S SWIFT *Chaetura vauxi*

# 5.02 WHITE-BREASTED NUTHATCH

*Sitta carolinensis*

---

Spaces in the center of the Portland Animal Estate, about five feet off the ground, serve as nesting cavities for the nuthatch.

PORTLAND ANIMAL CLIENT 5.02 WHITE-BREASTED NUTHATCH *Sitta carolinensis*

# 5.03 OLIVE-SIDED FLYCATCHER

*Contopus cooperi*

The very top of the Portland Animal Estate features a six foot long cantilevered perch for the olive-sided flycatcher, angled up at the end just to make sure she is at the very top and close to the bugs.

# 5.04 SILVER-HAIRED BAT

*Lasionycteris noctivagans*

---

Louvered panels on the Portland Animal Estate tower simulate sloughing bark, accommodating silver-haired bats. The panels are painted black and face south to absorb the warmth of the sun for the heat loving bats.

# 5.05 NORTHWESTERN GARTER SNAKE

*Thamnophis sirtalis tetrataenia*

A pile of salvaged concrete slabs on the south side of the Portland Animal Estate provide a warm place for the northwestern garter snake to sunbathe. Underneath there is a hibernaculum, a chamber for the long winter sleep.

PORTLAND ANIMAL CLIENT 5.05 NORTHWESTERN GARTER SNAKE *Thamnophis sirtalis tetrataenia*

# 5.06 ORANGE-RUMPED BUMBLEBEE

*Bombus melanopygus*

---

The bottom of the Portland Animal Estate contains a nesting chamber for the bumblebee. The front door is a small bright magenta tube, the contrasting color attracts them.

# 5.07 SNAIL-EATING GROUND BEETLE

*Scaphinotus angulatus*

Logs at the base of the west side of the Portland Animal Estate provide cover for the snail-eating ground beetle. Keeping some snails around will also ensure that this beetle sticks around too.

PORTLAND ANIMAL CLIENT 5.07 SNAIL-EATING GROUND BEETLE *Scaphinotus angulatus*
